

SIP-Trunk

Here you have the option of adding telephone numbers for signalling, new telephone numbers or internal telephone numbers. Please note that no emergency numbers or speed dial numbers are used (112, 117, 161 ...).

Numbers

Please make sure to enter a valid telephone number to avoid misrouting. Do not use the internal telephone numbers as the displayed number.

DDI Number blocks

If you have a block of numbers e.g. 049 888 22 00 to 049 888 22 99, you can enter them as follows: 0498882200-0498882299 no spaces and enter the whole number. Adding the telephone number takes a while depending on the number of numbers that are created.

Suppressed number

To make calls with a suppressed number, you have to add *anonymous* as "Outgoing only" number
